Advanced Manufacturing Collaborative

At-a-Glance

- ▶ Savannah River National Laboratory's (SRNL) Advanced Manufacturing Collaborative (AMC) expands the lab's footprint beyond the Savannah River Site, reducing barriers to working with top experts in environmental technologies, energy infrastructure, nuclear energy and fusion energy.
- ▶ Located at the University of South Carolina Aiken, the AMC will drive engagement between the laboratory, academia and private industry to develop and deploy new technologies for manufacturing innovation.
- ▶ By bridging R&D with real-world applications, the AMC will serve as an economic catalyst for the Southeast region and its robust manufacturing ecosystem to solve regional and national challenges.
- ▶ Current industry partners include Siemens, Silica-X, General Atomics, Antares, Gravitas, Nu Vision and more.

Technical Capabilities Include
